Integrated M.Tech in Software Engineering

CAREER OBJECTIVE

Software engineering student interested in full stack development and networking, aiming to build scalable applications and solve real world problems through efficient software solutions.

EDUCATION

• Integrated M.Tech in Software Engineering	2022 – 2027
• <i>Vellore Institute of Technology, Andhra Pradesh</i>	CGPA: 8.51
• Class XII Science	2020 – 2022
• <i>Sri Chaitanya PU College, Bengaluru</i>	CGPA: 8.21

PERSONAL PROJECTS

- Resume Screening Web Application** (Python, Flask, NLP, Machine Learning, MongoDB) GitHub
 - Developed an NLP based resume screening system to process and rank resumes automatically.
 - Designed TF IDF and Logistic Regression models for resume classification and job fit prediction.
 - Enabled bulk PDF and TXT uploads with automated text extraction, visualization, and storage.
- AI Resume Mentor Skill Gap Analyzer** (React, Flask, NLP, Gemini API, MongoDB) GitHub
 - Engineered an AI system to analyze resumes and match them with job descriptions for evaluation.
 - Built NLP skill extraction and gap analysis module using spaCy to identify missing competencies.
 - Integrated Gemini API to generate resume improvements, career insights, and ATS optimization.
- Pothole Detection Using CNN** (Python, TensorFlow, Keras, OpenCV) GitHub
 - Developed a CNN based model to detect potholes from road images using TensorFlow and Keras.
 - Applied image preprocessing and data augmentation to improve model robustness and accuracy.
 - Evaluated model performance using validation metrics to ensure generalization across datasets.
- BugRocket AI Powered Bug Smashing Agent** (React, JavaScript, Gemini API) GitHub
 - Built an AI developer assistant for debugging, code generation, and real time error analysis.
 - Designed a responsive React based interface with dynamic prompts and structured input handling.
 - Integrated Gemini API to enable context aware debugging and improve developer productivity.
 - Reduced manual debugging effort by automating error detection and resolution workflows.

TECHNICAL SKILLS AND INTERESTS

Languages: Java, C++, Python, C
Frontend Technologies: HTML, CSS, JavaScript
Backend Technologies: Flask, Spring Boot, REST APIs, JWT
AI and ML Frameworks: TensorFlow, Keras, Machine Learning, NLP
Databases: MySQL, MongoDB, Firebase
Tools and Technologies: Git, GitHub, VS Code, Postman
Core Subjects: Data Structures and Algorithms, OOP, DBMS, Software Engineering, Operating Systems, Computer Networks, Network Security, Cyber Security
Soft Skills: Problem Solving, Analytical Thinking, Critical Thinking

CERTIFICATIONS

- AWS Cloud Quest Cloud Practitioner** February 2025
Amazon Web Services
- AWS Educate Getting Started with Databases, Networking, Storage** March 2025
Amazon Web Services
- Career Essentials in Generative AI** August 2024
Microsoft and LinkedIn Learning
- Python Programming Virtual Internship** July 2024
CodSoft
- START Programme ISRO Overview of Space Science and Technology** July 2023
Indian Space Research Organisation ISRO
